- A.** Report the incident to the clients Chief Information Security Officer (CISO) immediately and alter the terms of engagement accordingly
- B.** Report the incident to the client's legal department and then follow up with the client's security operations team
- C.** Make note of the anomaly, continue with the penetration testing and detail it in the final report
- D.** Report the incident to the tester's immediate manager and follow up with the client immediately

Answer: D

NEW QUESTION: 3

You are preparing to launch Amazon WorkSpaces and need to configure the appropriate networking resources. What must be configured to meet this requirement?

- A.** At least two subnets in different Availability Zones.
- B.** A dedicated VPC with Active Directory Services.
- C.** An IPsec VPN to on-premises Active Directory

D. Network address translation for outbound traffic.

Answer: A,D

NEW QUESTION: 4

You plan to deploy a file server to a temporary location.

The temporary location experiences intermittent power failures.

The file server will contain a dedicated volume for shared folders.

You need to create a volume for the shared folders. The solution must minimize the likelihood of file corruption if a power failure occurs.

Which file system should you use?

A. NFS

B. FAT32

C. NTFS

D. ReFS

Answer: D

Explanation:

Explanation

The ReFS file system allows for resiliency against corruptions with the option to salvage amongst many other key features like Metadata integrity with checksums, Integrity streams with optional user data integrity, and shared storage pools across machines for additional failure tolerance and load balancing, etc.
