Answer: B,D

NEW QUESTION: 3

According to you, which of the following statement is incorrect in respect to J2EE Configuration:

Please choose the correct answer.

Response:

A. For the J2EE Configuration First The Java engine and the local SLD of the SAP Solution Manager System will be configured. The Solution Manager uses its local SLD to read technical system information. Then Once the local SLD is configured, you can read the data from the

local SLD and update the system definitions in SMSY.

B. To have manual maintenance, Solution Manager uses its local SLD to read systems information like servers, databases, system component levels, application servers, support pack levels, and so on.

C. The Java engine and the local System Landscape Directory (SLD) of the SAP Solution Manager System will be configured during the J2EE Configuration.

D. To work with the Solution Manager tools, you need technical information about the connected systems in the Solution Manager System landscape (SMSY).

Answer: B
