NEW QUESTION: 1
You have a computer that runs Windows 7. The computer is a member of an Active Directory domain and has a shared printer. Users report that they can print to the shared printer, but they cannot delete their print jobs.
You need to ensure that users can delete their own print jobs.
What should you do?
A. Restart the Print Spooler service.
B. Stop sharing the local printer and then share it again.
C. Assign the Manage Documents permission to CREATOR OWNER.
D. Assign the Manage Documents permission to SYSTEM.
Answer: C
Explanation:
Explanation/Reference:
Explanation:
Manage Documents
The user can pause, resume, restart, cancel, and rearrange the order of documents submitted by all other users. The user cannot, however, send documents to the printer or control the status of the printer. By default, the Manage Documents permission is assigned to members of the Creator Owner group. When a user is assigned the Manage Documents permission, the user cannot access existing documents currently waiting to print. The permission will only apply to documents sent to the printer after the permission is assigned to the user.
