Joe is exchanging encrypted email with another party. Joe encrypts the initial email with a key.

When Joe receives a response, he is unable to decrypt the response with the same key he used initially.

Which of the following would explain the situation?

- A. Out-of-band key exchange has taken place
- B. An ephemeral key was used for one of the messages
- C. Asymmetric encryption is being used
- D. A stream cipher was used for the initial email; a block cipher was used for the reply

Answer: C
