NEW QUESTION: 1

- A. Option A
- B. Option D
- C. Option C
- D. Option F
- E. Option B
- F. Option E

Answer: A,B

Explanation:

A: Conditional and system locations can be manually activated, which means that the location remains active until explicitly disabled.

D: A location comprises certain elements of a network configuration, for example a name service and firewall settings, that are applied together, when required. You can create multiple locations for various uses. For example, one location can be used when you are connected at the office by using the company intranet. Another location can be used at home when you are connected to the public Internet by using a wireless access point.

Locations can be activated manually or automatically, according to environmental conditions, such as the IP address that is obtained by a network connection.

NEW QUESTION: 2

SIMULATION

_____ is defined as a person who works for the victim organization and who is primary culprit

Answer:

Explanation:

Principal perpetrator
