Although there are other factors, it puts you in a good **Latest HP2-H73 Test Testking.pdf** and higher position because your indicates that you are not at the same level as someone who is not certified.

NEW QUESTION: 1

When you post an invoice, you receive an error message.

Which two actions does the system apply to the invoice? Each correct answer presents a complete solution.

- A.** The invoice is placed in the pending vendor invoices list.
- B.** The error log is presented to the user and then deleted.
- C.** The error log is presented to the user and then saved.
- D.** The invoice is placed on hold.

Answer: C,D

Explanation:

D: If the invoice was on hold and all problems with the invoice have been corrected, clear the On hold check box. You cannot post invoices that are on hold.

B: The error log files are created for each day. When the first error occurs during the day, the error log file is created, and the error message is appended to the newly created error log file. All subsequent error messages are appended to the existing error log file for the day.

Note: IDMF (Intelligent Data Management Framework) logs error events in a log file in a folder named Log under the installation folder. The default installation path is C:\Program Files\Microsoft Dynamics AX Intelligent Data

Management Framework. IDMF creates the log file when the first error message is generated. The file is named

trace_mm-dd-yyyy.log, with mm-dd-yyyy providing the current month, day, and year. The IDMF scheduler service

creates an error log file called servicetrace_mm-dd-yyyy.log.

Incorrect:

Not C: Pending invoices (form) [AX 2012]

Use this form to view vendor invoices that have been saved and matched to product receipts, but not posted.

Reference: Key tasks: Vendor invoices [AX 2012]

Troubleshoot the Microsoft Dynamics AX Intelligent Data Management Framework (IDMF) [AX 2012]

NEW QUESTION: 2

You are using drill down reporting to evaluate data in Profitability analysis and you have defined an exception for an entire column, which of the following functionality is available in the drill down report?

There are 2 correct answers to this question.

Response:

- A. The exception can be applied to entire list of the report.
- B. The exception is not visible if we drill down to next level.
- C. The exception consists of two threshold values.
- D. The exception can be defined on a drill-down list.

Answer: C,D

NEW QUESTION: 3

Which of the following is used by a computer professional to check power supply for power voltage?

- A. Multimeter
- B. ESD Strap
- C. Device Driver
- D. SCSI

Answer: A
